MCS Steering Group Meeting

Agenda: The committee was voting on “Steering Group Ex-Committee Paper June 2011 – MCS Transition List’.

1. Background

On 28th June 2011, the Chairman wrote to the Steering Group seeking its views on the above paper. The paper set out a particular wind turbine manufacturer’s request to extend beyond the 30th June 2011 deadline their listing under MCS Transition Arrangements.

2. Outcome

Twenty-nine organisations were eligible to participate, and nineteen of these responded by the deadline. The voting was as follows:

- Approved the application for an extension: 1
- Rejected the application for an extension: 16
- Abstained: 2

As per Steering Group protocol, the minutes do not attribute votes to individuals. Therefore the application to extend the Transition listing was rejected.
